⚠ WARNING

Do not exceed GVWR or GAWR, including blade and ballast.

⚠ CAUTION

Read this document before installing the skid steer attachment plates.

⚠ CAUTION

Use standard methods and practices when attaching snowplow and installing accessories, including proper personal protective safety equipment.

INSTALLATION INSTRUCTIONS

Install the skid steer attachment plates to the coupler mounting hubs on the back of the blade using a 1/2" x 1-1/2" cap screw, two 1/2" flat washers, and a 1/2" locknut at each mounting hole, as shown. Tighten fasteners to 75 ft-lb.

ATTACHING SNOWPLOW TO SKID STEER

The pusher plow skid steer attachment plates are designed to work with the vehicle's OEM attachment bracket.

1. Remove the bucket from the skid steer loader.
2. Position the skid steer close to the snowplow with the mount points on the skid steer plate aligned with the pusher plow attachment plates.

3. Tilt the skid steer plate forward and position the top edge of the plate under the receiving pockets on the attachment plates.

4. Slowly raise the arms on the skid steer and tilt the skid steer plate toward the cab until the snowplow mount plates are flush with the skid steer plate. Turn the skid steer engine OFF.
5. Engage the locking levers by rotating both handles 90° to a horizontal position. The skid steer locking levers shall insert into the snowplow lever receiving holes.
